SCHOOL FINANCIAL MODULE

Creating a culture of community through

TRUST, TEAMWORK AND TRANSPARENCY.
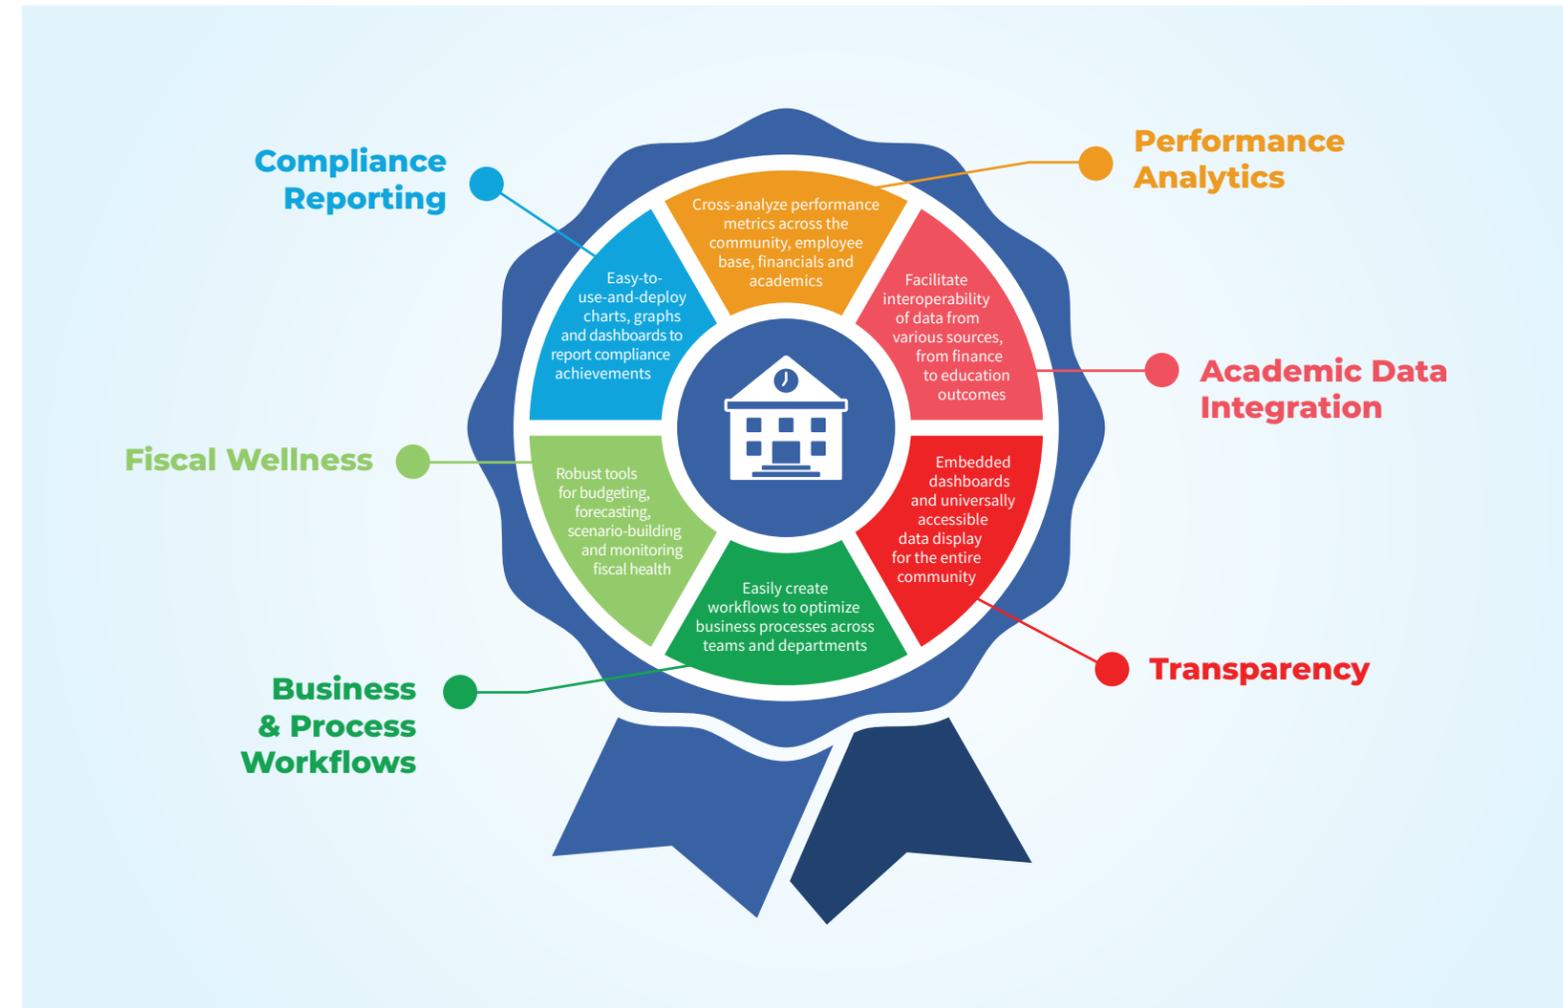

Say hello to EASY.

Munetrix®

Together, we can build trust, facilitate transparency, and strengthen a culture of community. But standing in the way is everything *else* we have to do. Educators, administrators and finance directors everywhere are being asked to do more with less.

A comprehensive suite of powerful, interdependent solutions for the whole district, and the whole student—taking multi-level, complex data sets and making them simple to understand, report and act upon:

Transparency

Cross-analyze performance metrics across the community, employee base, financials and academics

Easy-to-use-and-deploy charts, graphs and dashboards to report compliance achievements

Facilitate interoperability of data from various sources, from finance to education outcomes

Robust tools for budgeting, forecasting, scenario-building and monitoring fiscal health

Embedded dashboards and universally accessible data display for the entire community

Easily create workflows to optimize business processes across teams and departments

From financials and transparency compliance to planning and progress reporting, Munetrix has easy-to-adopt and easy-to-use modules that facilitate simpler and more robust forecasting, capital planning and performance management.

Munetrix brings you the most comprehensive data analytics and management solution for school districts in one suite of apps, harvesting and contextualizing **publicly available data and privately generated data in one powerful combination.**

More transparency. More trust. Stronger districts and communities...Say hello to easy!

Harness, understand and easily report data across multiple departments by putting the power of performance analytics at your fingertips.

# PERFORMANCE ANALYTICS & FISCAL WELLNESS

Create linear regression budgets in a matter of minutes, as well as multi-year forecasts with multiple scenarios, to assess potential outlooks and plan for the future.

Generate multiple reports to better understand performance, staffing trends and costs related to salary and benefits.

Set fund balance targets to obtain departmental desired limits to help build long-term sustainability into operations.

Compare enrollment trends against staffing trends to easily visualize operational and budgetary status/forecasts.
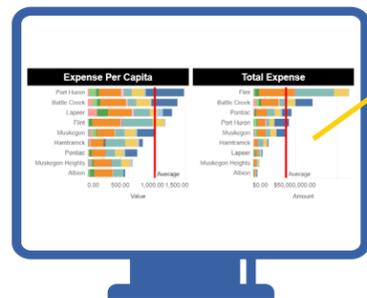

Provides users with easily-accessible data visualizations for analysis of financials and operations relative to other schools and districts.

Easy-to-use interpretive charts and graphs help policy makers understand the true situation and helps auditors in the preparation of "supplemental" reports.

Munetrix promotes current and predictive aspects of financial wellness. How healthy are you today, and how healthy are you likely to be in the future, based on your school's forecasts and budget assumptions?
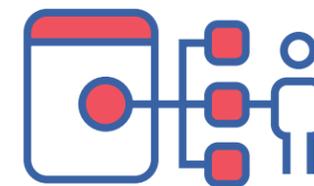

TRANSPARENCY & COMPLIANCE REPORTING
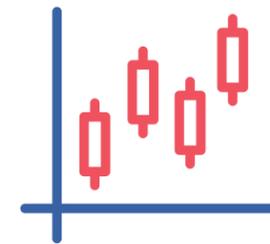

Quickly transform multi-level complex data into easy-to-comprehend visualizations.

Provide consistent, relevant and actionable data to stakeholders leading to greater transparency and collaboration.

Share data to communicate and publicize your district's story, goals and mission to community members for improved transparency.

Interactive data sets with multiple filters can be made available to the public to support FOIA requests.

Simplify the scheduling, management, reporting and training for School Safety Drills and ensure compliance and facilitate transparency.

Customizable performance dashboards easily embed into your website for optimal transparency.

Dozens of reports, graphs, key performance indicators and other metrics are included in Munetrix, showing exactly how public dollars are being spent.

# DATA MANAGEMENT & BUSINESS PROCESS WORKFLOWS
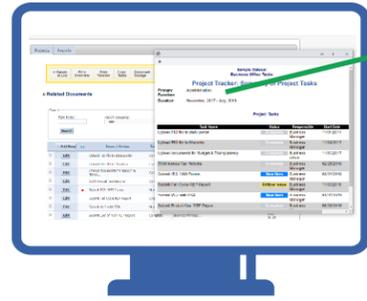

Complete Gantt-style project management tool with built-in reminders, workflows and smart templates, with simple data import/export features for ease of use, with no outside support required.

Comprehensive report building capability and document storage helps lower or eliminate costs associated with expensive consultancies.
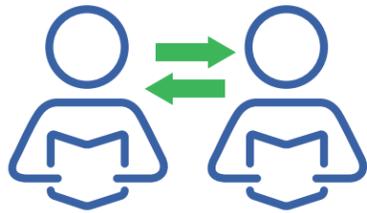

Replaces difficult and time-consuming project workflows by allowing users to update projects collaboratively on a continual basis, in one central location.

An unlimited number of documents can be added to create a single-source database solution to manage otherwise disparate and complicated datasets.
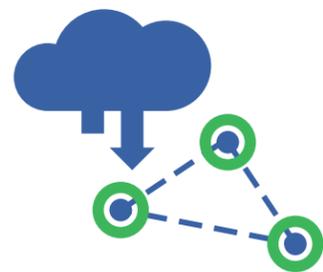

Eliminates hard-to-understand and often misplaced Excel-based spreadsheets to facilitate collaboration and knowledge sharing for better succession planning.

Provide administrators with greater granularity and understanding of the patterns associated with student movement and enrollment projection.

Designed to provide robust yet intuitive solutions to serve the entire community, the complete suite offers a holistic platform that empowers school districts to analyze all of their data with a single log-in and destination, supporting horizontal succession planning, building institutional knowledge, and workflow management all in one place.

Let's create a **culture** of **community** together, through **trust, teamwork** and **transparency.**

With technology this robust, this easy to use, and this comprehensive serving as the liaison between school districts and the constituents they serve, there should be *more* trust in our educational system, not *less*. It's never been easier to inject greater transparency into the data we manage, without burdening our teams nor our families with confusing, cumbersome and conflicting technologies.

Say hello to Munetrix, the comprehensive, all-in-one solution for school district administrators leading the charge to foster stronger communities.
